### About

Curiosity driven backend developer.

Worked with amazing people from companies around the globe. For a period of 7 years, had many opportunity to work in wide spectrum of tech stack components, which helped to gain significant amount of experience. Had many opportunities to work in a wide range of technologies. Has expertise in analysis, design, development and maintenance of a large scale object oriented project.

Worked with multiple techstack components like Spring boot, Spring security, Couchbase, Active-MQ, Kafka.

### Professional Experience

- Over 7 years of experience developing applications using Java/J2EE technologies.
- Expertise through all parts of Software Development Life Cycle (SDLC) in developing web applications using JAVA, J2EE.
- Conversant with designing, building and supporting applications in JAVA & J2EE.
- Knowledge in Spring, Hibernate, Spring boot and Spring Security.
- Expertise on Relational DBs (Oracle/ Postgres).
- Front-end development experience with JavaScript, HTML5, Angular JS
- Expertise on Java REST/Soap web services development.
- Experience with version control systems Git, SVN.
- Expertise in analysis, design, development, testing and maintenance of large scale object oriented applications.

## Career

### TCS

#### IT Analyst

🌟 Back End Developer

📅 Feb 2022 - Present

1. Worked as a developer in Telecommunication domain.
2. Understanding SNMP, SFTP, FTP, SLS and TLS protocols.
3. Collecting customer requirements and taking action based on them.
4. Designing new features as per the requirement and undergoing different review process.
5. Log analysis to identify the issues reported in production environment.
6. Maintaining code quality throughout the development & implementation process.

Java

Spring boot
